CLIMAX MINIS MIGHTY MAX

At only three inches, the Mighty Max is the smallest vibrator we've ever encountered, but for such a tiny toy, it has a lot of power. Although the Mighty Max is a multi-speed toy, we find it works best at its highest setting, which provides a nice buzz. It's also easy to stash wherever you may want to keep an emergency plaything, and its size will prevent even sex-toy aficionados from figuring out that it's the real deal.

HARDWARE

Most sex toys these days come in pinks and purples and pretty packages. But not Topco's Hardware. Designed to resemble items typically found in a toolbox, the slate-gray silicone toys are perfect for those looking for more masculine playthings. With drill bit and screw dildos, vibrating clamps, and hex nut cockrings, there's a tool for just about any job, whether you want to act out your favorite grease-monkey fantasy or are just in the mood for something new.

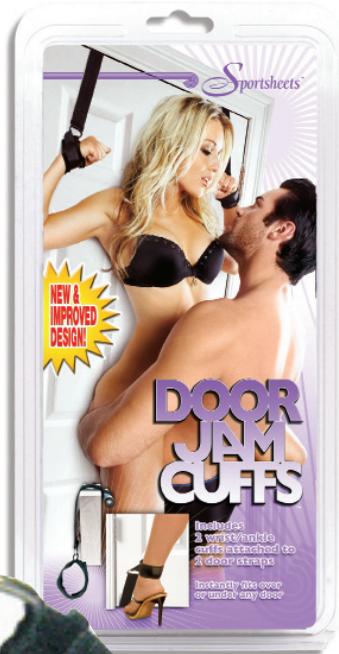

SIRI

One of Lelo's most powerful vibrators, the Siri, was designed to be both a clitoral vibrator as well as a massager, and its six modes of vibration—and its numerous speeds—take care of all your buzz-worthy needs. Siri's ergonomic design directs those vibrations exactly where you want them, and its quiet-yet-strong motor allows for discreet use. And while it can't read your texts or act as a GPS, we still consider Lelo's Siri to be the best.

DOOR JAM CUFFS

Favorites of Pet of the Year Jenna Rose, the Door Jam Cuffs are some of our favorite restraints. The cuffs are attached to long straps and short, weighted bars. Simply hang the straps over any standard door, close the door firmly and, *voila*, suspended wrist restraints! We recommend using the cuffs to give your partner something to hang onto during standing sex, but you can use them for S&M play as well. And since they're easy to use and leave no marks, they're the perfect accessories to pack when you travel.

RHYTHM O BOUNDING BUNNY

With seven modes of vibration and three speeds of shaft rotation, the Bounding Bunny gives you dozens of options for stimulation. The shaft is packed with 90 rotating beads for extra pleasure, and the clitoral bunny has its own motor, so you never have to decide between internal or external vibration. You can choose your own combination of speeds and pulse patterns, or press the "hot button" to let the bunny choose random functions for you. Either way, this vibrator is sure to give you a big O!
